4/10/2023 Earnings Release

Revenue growth assumed in the most important segments

Berentzen is expected to report Q3 2023 results on 24 October. We believe that the company will continue its positive revenue trend and post revenues (excl. alcohol tax) of $\mathop{\in} 50.2\text{m}$ (+4.3% y-o-y). Higher revenues will be driven more by price increases than by volumes given the reduced purchasing power of consumers. Mio Mio will continue its dynamic growth and contribute to a rise in revenues in the Non-alcoholic Beverages segment ($\mathop{\in} 16\text{m}$, +5% y-o-y), whereas the Berentzen and Puschkin brands should positively impact revenues in the Spirits segment ($\mathop{\in} 28.1\text{m}$, +10% y-o-y). Fresh Juice System is anticipated to grow by 6% y-o-y to $\mathop{\in} 5.5\text{m}$ revenues.

Price inflation reduces margins

In view of the cost increases (raw materials, logistics, personnel) we expect that EBITDA will decline by 6.8% y-o-y to 0.0% 4.8m (EBITDA margin 0.0%, -110bp y-o-y) and EBIT by 12.8% y-o-y to 0.0% 2.7m (EBIT margin 0.0%, minus 110bp y-o-y). Margins (EBITDA, EBIT) are based on revenues excl. alcohol tax.

We reiterate our Outperform rating

We believe that the company will reaffirm its forecast for the current financial year (revenues in the range of € 185m-€ 195m, EBITDA of € 15.6m-€ 17.6m, EBIT of € 7m-€ 9m) and continue to improve the quality of its earnings based on its strategically important categories such as Mio Mio, spirits of the Berentzen and Puschkin brands, premium-quality private-label spirits, and the products of the Citrocasa brand. We stick to our target price of € 10 and confirm our Outperform rating.

Valuation method

Our target prices are established on a 12-month timeframe and we use three valuation methods to determine them. First, the discounting of available cash flows using the discounting parameters set by the Group and indicated on ODDO BHF' website. Second, the sum-of-the-parts method based on the most pertinent financial aggregate depending on the sector of activity. Third, we also use the peer comparison method which facilitates an evaluation of the company relative to similar businesses, either because they operate in identical sectors (and are therefore in competition with one another) or because they benefit from comparable financial dynamics. A mixture of these valuation methods may be used in specific instances to more accurately reflect the specific characteristics of each company covered, thereby fine-tuning its evaluation.

• Sensitivity of the result of the analysis/ risk classification:
