Berentzen also with gratifying Q2/22 performance

Preliminary reported H1/22 figures: The Berentzen Group has released its first, preliminary business figures. Group revenues achieved 17% growth to EUR 79.0m, an increase we had not expected (FMR: EUR 72.1m). We assume that this is due to both volume and price increases. From a different standpoint, the strategic growth areas such as the liqueurs of the Berentzen and Puschkin brands, the premium product concepts in private-label spirits or lemonade Mio Mio, and the fresh juice systems supported the increase in sales. The good development is also apparent on the earnings side. Group EBIT reached EUR 3.7m, also significantly higher than our forecast of EUR 2.7m. The EBIT margin was thus 4.7%.

Financial targets '22e increased after good half-year: Berentzen has taken the good performance in the first half of the year as an opportunity to moderately increase its targets for the year. Group revenues are now expected to reach the range of EUR 158.0 to 165.0m. Our previous revenue estimate of EUR 159.0m is within this corridor, but we have nevertheless made an increase to EUR 161.5m. The situation is similar for EBIT. The target is now between EUR 6.0 and 8.0m (before: EUR 5.0 - 8.0m). We now anticipate EUR 6.6m.

FMR: Target price slightly adjusted to rounded EUR 8.30: After adjusting our forecasts, the new price target is EUR 8.30 (before: EUR 8.15). As a result, the share continues to offer above-average upside potential.

The gradual reduction of Corona restrictions appears to have revived business, despite headwinds from material price increases. We are also positive about the outlook for Q3/22. As we look ahead to the fall, the risk of new restrictions could increase again. Currently, the stock has upside potential of around 30% at our new price target and we confirm our "BUY" recommendation.

6. Sensitivity of the evaluation parameters

The figures from profit and loss calculations, cash flow statements and balance sheets which form the basis of the company evaluation are date-related estimates and therefore subject to risks. These may change at any time without prior notice. Regardless of the evaluation methods used, there are significant risks that the price goal/trend will not be achieved within the expected time frame. The risks include unforeseeable changes with regard to competition pressure, demand for the products of an issuer and the offer situation with respect to materials required for production as well as non-occurrence of the assumed development. Such deviations may be the result of changes relating to technology and changes relating to the economy, legal situation and exchange rates. No claim is made that this statement of evaluation methods and risk factors is complete.

7. Key sources of information

We have acquired the information upon which this document is based from sources that we consider in principle to be reliable. However, we have not verified all this information. Therefore, we cannot guarantee or ensure the accuracy, completeness or correctness of the information or opinions contained in this document. National and international media and information services (e.g. Factset, Bloomberg etc.), the financial press (e.g. BörsenZeitung, FAZ, Handelsblatt, Wallstreet Journal, etc.), specialist press, published statistics, the internet, as well as publications, details and information of the issuer that is the subject of the analysis.

8. Summary of the basis for evaluation

Individual issuers: Current and recognised evaluation methods (e.g. DCF method and Peer Group Analysis) are used for company analysis purposes. The DCF method calculates the value of the issuer based on the sum of the discounted cash flows, i.e. the cash value of the future cash flows of the issuer. The value is therefore determined on the basis of expected future cash flows and the applied discount rate. In Peer Group Analysis, issuers listed on the stock exchange are evaluated by comparing ratios (e.g. price/profit ratio, Enterprise Value/turnover, Enterprise Value/EBITDA, Enterprise Value/EBIT). The comparability of the ratios is primarily determined with reference to the business activity and economic prospects.
